DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Chang (US 6667280)

The applied reference has a common inventor and Assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Chang teaches a well fluid which comprises an acid and erucylamidopropyl betaine within the scope of the present invention (see compound BET-E and claims 1, 7 and 25). Applicants use of "essentially consisting of" does not distinguish, since the fluid of Chang is still useful as a subterranean treating fluid.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1712

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1, 4, 5 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dahayanake (6258859).

Dahayanake teaches a composition for treating subterranean formations which comprises a surfactant such as an alkylamidopropyl betaine and an acid (see abstract), wherein the surfactant is included in similar amounts (column 6, lines 22-30).

Dahayanake teaches that the alkyl group may be erucyl (column 4, lines 1-6). Isopropyl alcohol may be included in the fluid (column 8, lines 8-12). Dahayanake differs from the present invention in that a specific example of the use of erucylamidopropyl betaine is not disclosed. It would however be obvious to one of ordinary skill in the art to utilize erucylamidopropyl betaine in the invention of Dahayanake, given the teaching of Dahayanake that that alkylamidopropyl betaines, including the erucyl type, are useful in forming a composition for treating subterranean formations.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the formation" in claim 15. Also "treating a subterranean hydrocarbons" lacks clarity.

Claim Objections

6. Claims 1 and 4 are objected to because of the following informalities: It is not clear if the parts encompassed by parentheses are part of the claimed invention. Such should be removed. Appropriate correction is required.
7. Claims 6-11 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. Claims 14 is allowable over the art of record.
